**Re: RCRA Facility Investigation Work Plan Addendum;
Ortho Diagnostic Systems, Inc., Raritan, NJ.**

Dear Ms. Nadai:

On behalf of Ortho Diagnostic Systems, Inc. (ODSI), McLaren/Hart Environmental Engineering Corporation (McLaren/Hart) is pleased to present two copies of the RCRA Facility Investigation (RFI) Work Plan Addendum for the ODSI facility in Raritan, NJ. Please distribute one copy to the Permits Administration Branch as referenced in Section H, Module I of the HSWA Permit. In addition, please call us to confirm the appropriate person in the New Jersey Department of Environmental Protection (NJDEP) to copy on this submittal.

The RFI Work Plan Addendum was prepared in response to EPA's May 11, 1994 comments to the June 30, 1993 Draft RFI Report, which was prepared by Dames & Moore. Appendix III of the RFI Work Plan includes a written response to each of EPA's general comments, page specific comments and Attachment A comments. For some comments, the responses provide clarification and/or previously missing information. Most of the remaining responses reference additional work in the RFI Work Plan Addendum. As we discussed, McLaren/Hart and ODSI have identified those comments which are not applicable to the site conditions.

The RFI Work Plan Addendum is divided into two volumes:

Volume I: contains the RFI Work Plan Addendum and Appendices I, II and III; and,

Volume II: contains Attachments A through I for Appendix III.

The laboratory selected by ODSI for the analytical work is American Environmental Network, Inc. (AENI), which is different than the laboratory identified in the original RFI Work Plan, dated August 17, 1990. A four volume set of the Standard Operating Procedures (SOP) for AENI is available upon EPA's request.

**Re: Revised Pages to RCRA Facility Investigation Work Plan Addendum;
RCRA Corrective Action Program;
Ortho Diagnostic Systems, Inc., Raritan, NJ.**

Dear Ms. Nadai:

On behalf of Ortho Diagnostic Systems, Inc. (ODSI), McLaren/Hart Environmental Engineering Corporation (McLaren/Hart) is enclosing two sets of revised pages for the RCRA Facility Investigation (RFI) Work Plan Addendum for the ODSI facility in Raritan, NJ.

Please replace or insert the following pages or sections which are provided herein:

- Revised Cover Page;
- Revised Title for Spines of Volumes I and II;
- Revised Page of the Table of Contents to Include Appendix IV; and,
- Appendix IV.

EPA's April 13, 1995 comments to the November 4, 1994 RFI Work Plan Addendum are addressed in the responses provided in Appendix IV.

As you are aware, ODSI is prepared to initiate the remaining field activities at the site shortly after receiving final approval of the RFI Work Plan Addendum.

Re: **Revised Sections of RFI Work Plan Addendum - Phase I;
Ortho Diagnostic Systems, Inc., Raritan, NJ;
NJD068715424.**

Dear Mr. Bellina:

On behalf of Ortho Diagnostic Systems, Inc. (ODSI), McLaren/Hart Environmental Engineering Corporation (McLaren/Hart) is enclosing the revised sections of the RCRA Facility Investigation (RFI) Work Plan Addendum for insertion and replacement into the June 6, 1995 copy. As requested by Henry Schuver of EPA, a second copy is being sent directly to Mr. Schuver while he is away on temporary leave of absence. A two week extension from the original due date (February 15, 1996) was granted by EPA for submission of this document so that ODSI could complete an internal review of the deliverable.

Pursuant to EPA's request, an Executive Summary has been included which summarizes recent project activities and also includes a listing of revised sections, figures and tables. This submission includes a UST Closure Report (Appendix V) for the recently discovered former 550 gallon gasoline UST that was identified as a Solid Waste Management Unit (SWMU). In addition, the requested SWMU Assessment Plan information for the former 550 gallon gasoline UST and the second newly identified SWMU (the process sewer line system) has been included in Appendix VI.

ODSI and McLaren/Hart believe that the proposed Phase I source characterization activities should sufficiently address the comments discussed with EPA and NJDEP during the December 14, 1995 meeting. After completion of the Phase I activities, a meeting is proposed to review the results of the Phase I investigation, and to discuss an appropriate scope of work for the Phase II groundwater investigation.
